Description

This is a course that exposes the student to general obstetrics and gynecology. The student will rotate through obstetrical services including labor and delivery, the gynecological services, and ambulatory clinics. There will be one call day. This rotation is designed to prime and prepare the student for an OBGYN internship. Medical students interested in an OBGYN residency are encouraged to experience this course.

Course Objectives

1. Be able to diagnose and manage common gynecological and obstetrical conditions.
2. Demonstrate improved history and physical on gynecological and obstetrical patients.
3. Get focused exposure to obstetrical procedures, especially vaginal deliveries and cesarean sections.
4. Assist in gynecological procedures in the operating room.
5. Become more familiar with managing the ambulatory gynecological and prenatal patient.
6. Obtain experience in working as a member of a healthcare team.

Student Experiences
